

# Business Productivity Online Suite

## The Suite at a Glance

Web-based central IT management portal

Centralized user access to all services

*An easy-to-use set of web-enabled tools that enable businesses of all sizes to access email, important documents, contacts and calendars from nearly any location*

The Business Productivity Online Standard Suite (BPOS) brings together online versions of our most trusted email and collaboration software in a single package.

Designed to help meet your needs for robust security, 24/7 reliability, and user productivity, these services can be up and running in minutes—helping businesses like yours improve productivity and reduce the cost and complexity of server management and maintenance.

### Enterprise-Class Security & Reliability

BPOS delivers online versions of Microsoft's email and collaboration systems that businesses have been using for decades, all designed for the reliability, availability and performance needed by smaller organizations.

- Helps protect your email environment with always-up-to-date anti-virus and anti-spam solutions.
- Helps safeguard your data with enterprise-grade reliability and disaster recovery, thanks to multiple geo-redundant datacenters and a strict privacy policy.
- Guaranteed 99.9% uptime with money-back Service Level Agreement.

### IT Control & Efficiency

BPOS virtually eliminates the time and effort that IT people must spend managing your email and collaboration servers—while keeping you firmly in control.

- Patches, security updates and back-end upgrades are automatically deployed so you don't have to.
- Web based access to system administration and user management.
- Subscription service plan allows for more accurate forecasting of IT expenditures with predictable annual costs and no hardware or upgrade costs.
- Purpose-built migration tools streamline getting started and user adoption.
- 24/7 IT-level phone support

### User Familiarity & Productivity

BPOS works seamlessly with Microsoft Outlook and the other Office programs your employees already know, while providing them with access to email, calendars, and contacts from nearly any device.\*

- 25 GB of mailbox storage per user without driving up storage costs.
- Password-protected sites where employees and external users can work together in real time on documents, spreadsheets, projects, and other files.
- Shared calendaring and centralized company directory makes scheduling

*Our best-business-grade communications and collaboration products, priced for businesses of any size.*
